

Cardinal Health, Nuclear Pharmacy Services Nuclear Medicine Imaging/Therapy Radiopharmaceuticals and Kits

Nuclear Medicine

The following is a list of kits and radiopharmaceuticals used in Nuclear Medicine diagnostic imaging and therapy. Refer to Cardinal Health, Nuclear Pharmacy Services Ordering and Licensing Information later in this section. In addition, please contact your local Cardinal Health Radiopharmacy for availability.

Cold kits

Apcitide
Arcitumomab (CEA)
Bicisate (ECD)
Capromab Pendetide
Depreotide
Disofenin (DISIDA)
Exametazine (HMPAO)
Glucaptate
Macroaggregated Albumin (MAA)
Mebrofenin
Medronate (MDP)
Mertiatide
Oxidronate (HDP)
Pentetate (DTPA)
Pyrophosphate (PYP)
Sestamibi
Succimer (DMSA)
Sulfur Colloid (SC)
Tetrofosmin
UltraTag RBC

Technetium labeled (Hot) radiopharmaceuticals

Tc-99m Apcitide
Tc-99m Arcitumomab (CEA)
Tc-99m Bicisate (ECD)
Tc-99m Depreotide
Tc-99m Disofenin (DISIDA)
Tc-99m Exametazine (HMPAO)
Tc-99m Glucaptate
Tc-99m Macroaggregated Albumin (MAA)
Tc-99m Mebrofenin
Tc-99m Medronate (MDP)
Tc-99m Mertiatide
Tc-99m Oxidronate (HDP)
Tc-99m Pentetate (DTPA)
Tc-99m Pyrophosphate (PYP)
Tc-99m Red Blood Cells (RBCs)
Tc-99m Sestamibi
Tc-99m Sodium Pertechnetate
Tc-99m Succimer (DMSA)
Tc-99m Sulfur Colloid (SC)
Tc-99m Tetrofosmin

Other (Hot) radiopharmaceuticals

Carbon-14 Urea
Cobalt-57 Cyanocobalamin
Chromium-51 Sodium Chromate
Fluorine-18 Fluorodeoxyglucose
Gallium-67 Citrate
Indium-111 Capromab Pendetide
Indium-111 Chloride
Indium-111 Ibritumomab Tiuxetan
Indium-111 Oxyquinoline (Oxine)
Indium-111 Pentetate (DTPA)
Indium-111 Pentetreotide
I-123 Metaiodobenzylguanidine (mIBG)
I-123 Sodium Iodide
I-125 Human Serum Albumin
I-125 Iothalamate
I-131 Human Serum Albumin
I-131 Metaiodobenzylguanidine (mIBG)
I-131 Sodium Iodide
Molybdenum 99/Tc-99m Generator
P-32 Chromic Phosphate
P-32 Sodium Phosphate
Rubidium-82 (from Sr-82/Rb-82 generator)
Samarium-153 Lexidronam
Strontium-89 Chloride
Thallium-201 Chloride
Xenon-133 Gas
Yttrium-90 Chloride
Yttrium-90 Ibritumomab Tiuxetan

For additional information, please contact Cardinal Health, Radiation Management Services customer service at 440.248.9300, 800.850.4608, or fax: 440.349.2307; located at 6045 Cochran Road, Cleveland, Ohio 44139-3303, USA.

Department Management System

Introduction

Department Management System is a multifaceted business management system specially designed for the health care industry. This comprehensive system combines a unique software program with on-line and on-site training and support. With unsurpassed, fully customizable capabilities built into the system, Department Management System enhances performance and productivity, and promotes increased revenues.

Designed for flexibility and user-friendliness, Department Management System utilizes simple drag-and-click navigation and can be easily customized to each user's individual preferences - from a choice of icons to the creation of personalized toolbars.

Benefits

- **Economy** Multi-tasking capabilities save time, reduce costs, improve productivity.
- **Efficiency** Department Management System tracks departmental procedures, maximizes scheduling flexibility, and produces a multitude of reports and graphs to enhance clinical and time management.
- **Productivity** Department Management System can create detailed departmental statistical analyses. Its built-in tracking and analysis capabilities can be applied to the full range of patient studies and associated activities, including nuclear medicine, radiology, CT, MRI, therapy and ultrasound.
- **Reliability** Backed by on-site and on-line support, Department Management System is the partner you can rely on.
- **Competitiveness** Through trend analysis, Department Management System helps you increase market competitiveness. It also provides an array of presentation and marketing materials.
- **Safety & compliance** Safeguards for staff, patients, and regulatory concerns are built into the Department Management System.

Features

- **Windows® based system** Multi-tasking environment - follows Windows standards.
- **Bar coding** Makes inventory entry much faster. Eliminates errors. No need to memorize procedure numbers, drug numbers, etc.
- **Centralized records** Allows easier and faster retrieval of departmental records. No need to retrieve log books to locate information. Facilitates inspections by NRC, State, or JCAHO.
- **Standardized records** Although many technologists may be entering information into the Department Management System, the resultant printouts and reports will always be the same. Eliminates penmanship problems.
- **Paperless record-keeping** Reports can be brought to screen for review. Based on individual regulatory requirements may eliminate the need to have paper record storage.
- **System customization** Allows the department to create their own parameters for record-keeping. The flexibility of the system ensures the least amount of change in the record-keeping format of the department.
- **Resource based scheduling system** Allows the department to schedule their own patients based on the resources they define (camera, room, technologist, time, etc.) Schedules may be printed in a variety of formats for distribution.
- **The "Day Board" concept** Allows for maximum viewing flexibility for the department. Customized warning messages ensure proper patient instructions are passed along.
- **Card file** Makes onetime data entry a reality. Patient information need only be entered one time. Patients are retrieved on subsequent visits by either name or number. Allows examination of previous patient study records.
- **Inventory Control** Provides documentation of all inventory receipt, disposal, and administration in one central location. Ensures regulatory compliance in tracking products utilized in the department.

- **Preparation parameters** Assures that kits are prepared in a proper manner based on package insert or user customization. Parameters and mixing instructions are easily accessible with one keystroke.
- **Inventory quality control** Ability to perform and record QC tests on prepared kits with user defined templates and parameters.
- **Edit/print inventory** Allows examination or printing of any or all inventory items without the need to physically locate and examine radioactive hot lab contents. Inventory is automatically decayed to current activity.
- **Daily report** Condenses the contents of multiple logs into reports that can be accessed individually and viewed on screen or targeted to print daily with little user interaction. Decreases the amount of manual paperwork. Audit logs allow the user to ensure that all patients have been dosed and all waste has been disposed of properly.
- **Waste disposal** Ensures regulatory compliance. Includes waste disposition information on each daily report. Complicated record keeping is simplified. System can be configured to dispose of both radioactive and biohazardous waste.
- **Tracking codes** Makes locating teaching files and other unusual cases a very simple process. This is great for preparing papers or compiling data on particular disease states.
- **Statistical analysis** Customer may produce a wide variety of analytical reports for the department at any time or automatically on a monthly basis. Saves a tremendous amount of time over manually produced reports. Increases professional presentation of reports. Information may be generated either in text or graphic form. Reports may be used to locate missed revenues, justify new equipment or personnel, determine product utilization or market the department to referring physicians.
- **Health physics module** Centralizes health physics records. Any performed health physics task may be accessed in the system for review or inspection. Reminder files make it virtually impossible to forget required tasks. Offers generation of patient dosimetry reports, individual studies or accumulative study exposure levels.
- **Quality improvement module** Makes the task of quality assurance reporting a pleasure. Professional text and graphic reports are sure to impress the JCAHO inspection team. Allows the department to create a quality assurance program unique to their department. QA is traditionally one of the most time-consuming tasks in the department, and this program will indeed save time.
- **Networks** Networking offers the large department two or more terminals to enable more than one tech access to the system. This is of particular benefit when clerical staff members are performing scheduling functions.
- **Multi-department functionality** Multiple departments can be designated within the same database to allow each to see and enter data unique to their area, but management to have access to all areas for statistical reports and monitoring.
- **Customer training** Much less time required mastering the basic functions of the system. Off-site training enhances the learning environment. Local training decreases the down time between training and use.
- **Call center/on-site support** Provides assurance to the customer that further instruction and problem solving will be addressed. Allows customers to learn the system in steps, as they are ready. Promotes full utilization of system features that will benefit the department.
- **Owned by Cardinal Health** The customer need call only one number to get fast response to any software issue. As the owner, Cardinal Health can assure the customer that we are committed to continuing support and enhancement of the system.

For more information, call 800.495.8832, option 1.

For additional information, please contact Cardinal Health, Radiation Management Services customer service at 440.248.9300, 800.850.4608, or fax: 440.349.2307; located at 6045 Cochran Road, Cleveland, Ohio 44139-3303, USA.

Electronic order or package receipt ability with Cardinal Health Radiopharmacies

Remote electronic order entry and electronic package receipt between the nuclear medicine department and the local Cardinal Health, Radiopharmacy is made possible by NUCLink (where available). Routine prescription orders for products as well as same day, STAT and nonradioactive product orders can be placed via NUCLink.

- **Remote Order System (ROE)** Eliminates need for a tech to call the pharmacy to place orders. Provides accurate ordering of products.
- **Electronic Package Receipt (EPR)** Eliminates the need for manual bar coding of the packing list into the system. Provides accurate receipt of products.

Increased department productivity

- Eliminates potential for verbal miscommunication
- Significantly reduces technologist phone time
- Review, approve and transmit orders by date range
- Verifies prescription automatically
- Significantly increase technologist productivity by eliminating the need to barcode in inventory items or manually enter product into inventory

Integrated verification controls

- Safeguards verify order accuracy before transmission
- Change orders available after initial transmission
- Each order checked at Cardinal Health by a licensed nuclear pharmacist
- Log files in the Department Management System permit historical tracking of doses

Improve inventory control

- Accurate inventory and patient dose tracking
- Facilitates easier report preparation for regulatory needs

Note: Available in most Cardinal Health locations.

For more information, call 800.495.8832, option 1.

Interfaces

Accurate patient demographic and procedure entry

An interface between the Cardinal Health's Department Management System in the nuclear medicine department and the hospital or radiology information system facilitates the importing of patient demographic and procedure data into Department Management System.

Accurate, efficient and flexible

- Single point of data entry
- Dynamic information throughput
- Departments can customize information flow

Improved patient management

- Reduced data entry time
- Increased patient record accuracy
- Faster, more accurate inter-department data transfer
- Improved resource scheduling
- Maximum potential for information utilization

Types of interfaces available

- HL7
- Custom point-to-point interfaces

Interfaces currently installed

- HBO
- IDXRad

For more information, call 800.495.8832, option 1.

For additional information, please contact Cardinal Health, Radiation Management Services customer service at 440.248.9300, 800.850.4608, or fax: 440.349.2307; located at 6045 Cochran Road, Cleveland, Ohio 44139-3303, USA.

Cardinal Health Medical Imaging Staffing Services

Nuclear Medicine

The advantage

Short on time and staff? During planned or unforeseen staffing shortages, you can depend on Cardinal Health Medical Imaging Staffing Services to keep your imaging department running.

Our staffing services allows you to maintain patient through-put while delivering an unsurpassed quality of care.

Our service is available to you as needed: full-time or part-time. For more information, please call your local Cardinal Health Radiopharmacy or toll-free: **866.796.7761**.

Reach us at
866.796.7761

The benefits

- Your business is local, so are our staffers
- Multiple methods of billing available
- Staffers trained in multiple medical imaging modalities
- Customized services

We offer

- Board certified, licensed technologists
- Flexible customized pricing
- Free evaluation and quote

Ways we can work together

- Permanent staffing
- Temporary staffing
- Complete outsourcing and department management

Staffing services are available in the following cities:

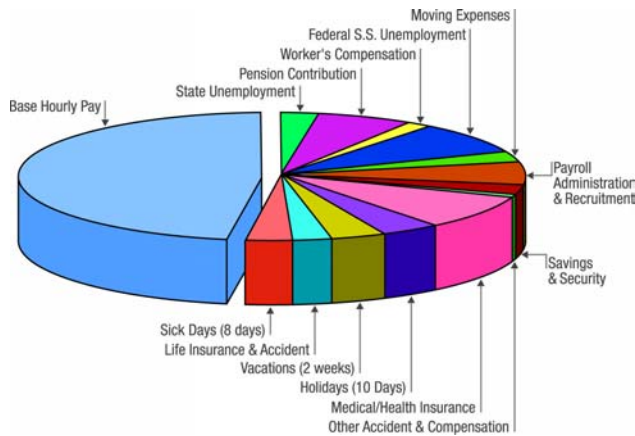

Birmingham	AL	Lexington	KY	Dayton	OH
Little Rock	AR	Louisville	KY	Toledo	OH
Phoenix	AZ	Boston	MA	Harrisburg	PA
Tucson	AZ	Baltimore	MD	Philadelphia	PA
Sacramento	CA	Detroit	MI	Pittsburgh	PA
San Diego	CA	Grand Rapids	MI	Providence	RI
San Francisco	CA	St. Paul	MN	S. Carolina	SC
Denver	CO	Kansas City	MO	Chattanooga	TN
Hartford	CT	Springfield	MO	Jackson	TN
Stamford	CT	St. Louis	MO	Knoxville	TN
Ft. Lauderdale	FL	N. Carolina	NC	Memphis	TN
Miami	FL	Las Vegas	NV	San Antonio	TX
Atlanta	GA	Buffalo	NY	Richmond	VA
Springfield	IL	New York	NY	Appleton	WI
Indianapolis	IN	Cleveland	OH	Milwaukee	WI
Wichita	KS	Columbus	OH		

Flexible staffing costs less from the company you trust

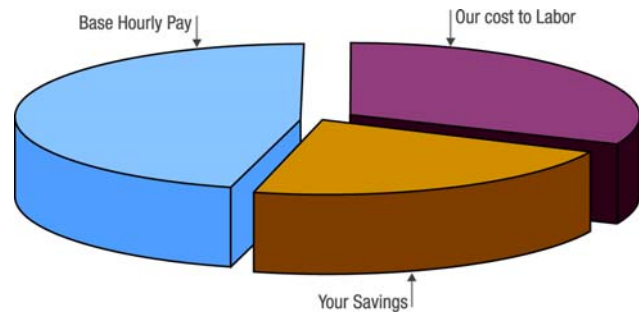

Cardinal Health Medical Imaging Staffing Services is designed to help you meet the demanding schedules of your medical imaging departments by providing highly-skilled technologists to hospitals and free standing imaging centers. Whenever and wherever you need them. For more information, please call your local Cardinal Health Radiopharmacy or toll-free: **866.796.7761**.

Savings

Your costs without Cardinal Health Medical Imaging Staffing Services

Your savings with Cardinal Health Medical Imaging Staffing Services

The advantage

We offer

- Board certified, licensed technologists
- Reduced costs for contracted customers
- We pay for licensure and continuing education
- Monthly invoices along with your pharmacy bill
- Free evaluations and customized service

You maintain productivity

- Decrease downtime
- Reduce overtime burden
- Flexible staffing
- No extra bookkeeping

You save money

- No payroll taxes
- No vacation pay
- No holiday pay
- No retirement pay
- No advertising cost
- No recruiting cost
- No training cost
- No human resources risk
- No probationary period

Why choose Cardinal Health Medical Imaging Staffing Services?

The benefits

- Your business is local. So are we. And our staffers
- Our service is customer-tailored to meet your individual needs
- We are a one-stop shop
- We provide a variety of ways to partner with you
- We offer multiple methods of billing based on your needs
- We provide service to multiple radiology modalities

- We work to develop partnerships that benefit and provide value to both parties
- We look to develop synergies that will help grow both your business and ours
- We share similar values: Patient-oriented service ethic. Quality products oriented to customer and employee safety
- High standards and expectations for success

Ways we can work together

- Permanent staffing
- Temporary staffing
- Complete outsourcing and department management
- Health physics services
- Hourly per-case flexible pricing

Cardinal Health Medical and Health Physics Services

Nuclear Medicine

Dependability

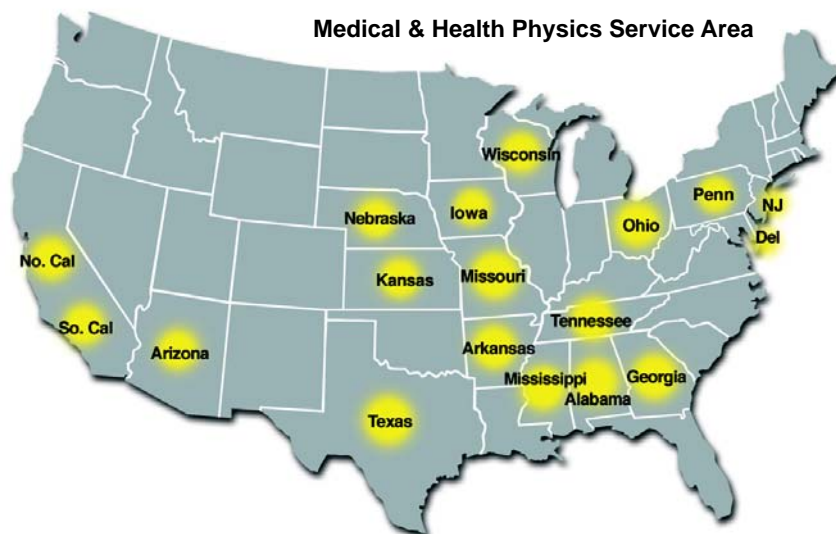

You can depend on the Medical and Health Physics Services business of Cardinal Health to provide high-quality physicists services for all your imaging department needs.

Regulatory compliance

The Medical and Health Physics business of Cardinal Health includes all the quality control procedures and record-keeping processes necessary for the operation of a nuclear medicine department. Medical physics plays a broader role and includes quality control monitoring of radiological imaging equipment to assure radiation safety and high-quality image resolution (e.g., mammography, CT, MR, ultrasound). Medical physicists also collaborate with radiation oncologists to design treatment plans and monitor equipment and procedures to ensure cancer patients receive the prescribed dose of radiation to the correct location. Both Cardinal Health's medical and health physics programs help ensure your imaging and treatment facilities meet the rules and regulations of the Nuclear Regulatory Commission, JCAHO, ACR accreditation and various health departments.

Where we are

The Medical and Health Physics Services business of Cardinal Health provides the physics consultants for your start-up needs nationwide (i.e., licensing, shielding, hot lab equipment and amendments). From our 18 locations, ongoing Medical and Health Physics Services are provided on a quarterly basis at locations listed below.

For additional information, please contact Cardinal Health, Radiation Management Services customer service at 440.248.9300, 800.850.4608, or fax: 440.349.2307; located at 6045 Cochran Road, Cleveland, Ohio 44139-3303, USA.

Specifications are subject to change without notice.

Cardinal Health, Nuclear Pharmacy Services Ordering and Licensing Information

How to reach your local Cardinal Health Radiopharmacy

Please contact your local Cardinal Health Radiopharmacy for details before placing an order. Note that terms and conditions may vary from country to country.

If you require equipment or services not featured in this catalog, please call us. Our product line is always being expanded, and we may be able to help you.

Order information requirements

To avoid errors and delays please include the following information:

- Shipping address
- Billing address
- Purchase order number
- Copy of radioactive materials license, if applicable
- Activity desired[†]
- Tax-exemption certificate, if applicable

[†] Actual activity content may vary from the stated nominal activity due to manufacturing tolerances and decay.

Prices

Quotations will be supplied on request. All orders are subject to tax and handling charges. All prices and specifications are subject to change without notice. International pricing can be obtained by contacting your local Cardinal Health Radiopharmacy.

When making a payment

- Make payments in favor of Cardinal Health
- Reference our invoice number on any checks

Payment is in U.S. dollars, unless otherwise specified.

Terms

Payment terms are payable upon receipt. Accounts not paid within a 30 day period are subject to 1.5% charge for each additional month; yearly charge is 18%. If the financial condition of the purchaser at any time does not justify continuance of production or shipment on the terms of payment specified, we may, in addition to other rights lawfully available, require payment or partial payment in advance. For international orders, contact your local Cardinal Health Radiopharmacy in your country for specific international terms.

Delivery

Cardinal Health is committed to maintaining excellence in processing and delivering your order as quickly as possible. We will make every effort to accommodate special shipping requirements that deviate from standard practice (additional charge may apply).

F.O.B. point

For domestic orders, all products in this catalog are F.O.B. shipping point, subject to change without notice. Cardinal Health can arrange for insurance at customer's expense.

Shipping method

Cardinal Health ships by the most economical common carrier. Rates vary by weight and distance. Domestic transit time is generally 3 to 7 working days. All shipments are made at the purchaser's expense and risk. Radioactive sources cannot be shipped by ground service. Method and route of shipments are at Cardinal Health's discretion, unless the purchaser supplies explicit instructions confirmed by Cardinal Health in writing. If special crating is requested, additional crating shall be added at the expense of purchaser. International orders must specify freight forwarder.

Taxes

Customer is responsible for all taxes. Cardinal Health will invoice the customer for all sales taxes. If applicable, the customer may provide Cardinal Health with evidence of tax exemption.

Damage in shipment

Our packaging complies with and, in most cases, exceeds normal shipping requirements. Despite the care used in packaging, damage sometimes occurs in transportation. All shipments must be opened immediately upon receipt for inspection of concealed damages occurring in transit. On discovery of any damage, stop unpacking, hold the shipping container and ask the carrier for an inspection report. Carrier notification must be made immediately. All claims for damage should be made against the transportation company.

Return shipment policy

All return or exchange of products must be prearranged with your local Cardinal Health Radiopharmacy within 30 days after receipt of an order. Returns or exchanges will be issued a Return Authorization Number. A restocking fee may be charged if applicable. Return or exchange may not be available in certain countries.

Return of radioactive material

Prior to the return of any radioactive material, customer must obtain a Return Authorization Number and shipping instructions from the local Cardinal Health Radiopharmacy. Under no circumstances will credit or replacement be issued for returns not identified with a return number. After receiving authorization, Cardinal Health will furnish specific instructions for the proper return of the material, including shipping documents, labels and packaging material.

Refund policy

Cardinal Health may credit your account or replace the shipment of product under the following circumstances:

- If your order has been incorrectly filled by Cardinal Health
- If the product does not meet specifications contained herein

In any of these above situations, notify your local Cardinal Health Radiopharmacy within 30 days of receiving the product. Otherwise, credit or replacement will not be issued.

Cancellation policy

Orders for regularly stocked catalog items may be canceled or changed at no charge provided notice is given at least 24 hours before the shipping date. Orders that can be changed or canceled on the day of shipment will incur a cancellation fee of 10%. However, if you cancel an order that requires special packaging less than 48 hours before the requested shipping date, then Cardinal Health will invoice you for 50% of the purchase price.

Orders for catalog items with a predated order cutoff (including short-lived radionuclides, non-prepackaged radionuclides, and microspheres) cannot be canceled within 48 hours of scheduled shipment.

Product availability

Cardinal Health reserves the right to make changes in its products and services offering, at any time and without prior notice.

Design changes

We reserve the right to make changes in the design of our products at any time, without incurring any obligation to install such changes on our products previously sold.

Limited warranty

Cardinal Health warrants that, at the time of shipment, Cardinal Health products sold are free from defects in material and workmanship. Cardinal Health makes no other warranties, including any warranty of merchantability or fitness for a particular purpose, express or implied, with respect to the products. In no event shall we be liable for transportation, installation, adjustment or other expense which may arise in connection with such products or their servicing or adjustment. Notification of any breach of warranty must be made within 30 days of receipt, or within the half-life of the radioisotope contained in the product, whichever period is shorter. No claim shall be honored if the customer fails to notify Cardinal Health within the period specified.

In no case is Cardinal Health responsible for customer's, or any third party's, incidental, consequential or indirect damages of any kind (including, but not limited to, loss of use, sales, profits or business interruption).

All statutory warranties are expressly negated and excluded. Use or misuse by the customer and/or agents, employees or others will, at the option of Cardinal Health, void all warranties. The benefits of this warranty shall extend only to the purchaser and to none other. No agent, employee or representative of Cardinal Health has any authority to bind Cardinal Health to any representation or warranty concerning the products sold herein. No waiver, alteration or modification of the foregoing conditions shall be valid, unless made in writing and signed by a Cardinal Health officer.

Force majeure

Cardinal Health shall not be liable for any failure or delay because of force majeure, including but not limited to Acts of God, war, insurrection, riot, fire, explosion, flood, sabotage, accidents or breakdown or damage of transport, strike or other labor disturbances, governmental action, or any other cause beyond Cardinal Health's reasonable control.

Conflicting terms

Our acceptance of purchaser's order is expressly limited to the terms and conditions contained herein. Any additional or different terms or conditions contained in purchaser's response are rejected without further notice, and shall have no effect or in any circumstances be binding. By placing an order, customer explicitly agrees to all terms and conditions contained herein.

Regulations concerning the commercial use of research products

The research products listed in this catalog are intended only for research and analysis use.

Radioactive materials

In most areas of the world, the possession and use of radioactive materials is regulated by law, and purchasers must possess licenses or permits issued by governmental regulatory authorities. In addition, users of radioactive materials may be subject to local and institutional regulations. Compliance with institutional, local, state, national and international regulations concerning the procurement, or national license possession, and use of radioactive materials, is the responsibility of the purchaser.

Licensing requirements

A photocopy of your NRC or Agreement State License must accompany orders for radioactive sources or material and must clearly indicate your authority to possess the items being ordered.

Limitations on use

All pharmaceuticals and drugs are for end use only by the purchaser, and cannot be resold by law, except if specifically authorized and licensed to do so. As a condition of purchase, the purchaser hereby certifies that all pharmaceuticals and drugs shall be used solely for the purposes intended, and they shall be used and disposed of only within the scope of currently recognized critical standards related to human health and the physical environment.

Note

This catalog information is the property of Cardinal Health. Copying or transmittal to third parties (in whole or in part) and use for any purpose other than the intended purpose, is expressly prohibited.

For additional information, please contact Cardinal Health, Radiation Management Services customer service at 440.248.9300, 800.850.4608, or fax: 440.349.2307; located at 6045 Cochran Road, Cleveland, Ohio 44139-3303, USA.

InteCardia Nuclear Cardiac Imaging Services & Solutions

Nuclear Medicine

- Nuclear Cardiac Imaging...
in your own office
- No upfront capital required
- Total turnkey solutions

Fee-Per-Scan, a comprehensive, cost-effective, and efficient turnkey solution to opening a cardiac nuclear imaging suite in your own office. See next page for more Fee-Per-Scan details.

Turnkey solution provides:

- Total project management
- Equipment evaluation and purchase
- Staffing - certified nuclear medicine technologist
- Licensing and radiation safety services
- Professional reading services
- Site management services

Practice gains:

- New revenue stream
- Increased independence and control
- Enhanced reputation for total patient care and convenience
- Stronger competitive position

Reach us at:

InteCardia, Inc.
1220 Old Alpharetta Rd.
Suite 330
Alpharetta Georgia 30005
678.455.2113
888.841.2741, Ext. 2113
Fax: 818.251.8204
bcloud@intecardia.com
www.intecardia.com

Fee-Per-Scan program

InteCardia provides:

Total project management:

New site development to include

- Site survey/floor plans for imaging equipment placement and hot lab build-out
- On-going consultation with architects, contractors, property manager, and administration
- Coordination and over-site of all aspects of delivery and installation with equipment vendors
- Modality specific requirements - modem, electrical, lighting, cooling
- Setup and quality control checks of all hot lab instrumentation
- Acceptance testing & applications training on/off site
- Hot Lab instruments and accessories

Licensing/radiation safety

- Contractual agreement between InteCardia and a Health Physics Group
- Radioactive Materials License Application
- Health Physics quarterly and annual audits
- Radiation Safety protocols
- Dosimetry contracts
- Nuclear Policy & Procedure Manual
- InteCardia contract pricing for Radiopharmaceuticals

Administrative

- CPT coding & insurance reimbursement information
- Direct assistance provided to billing personnel
- Direct assistance provided to accounts payable for associated monthly invoices and EOBs
- Scheduling setup
- Establishment of pricing and delivery of daily operational supplies

Staffing

- InteCardia Certified Nuclear Medicine Technologist
- Backup technologist for scheduled time off
- Emergency fill-in only when staffing availability permits

Management

- Efficient daily operation of ancillary services with direct physician oversight and direction
- Implementation of ASNC Facility Accreditation
- OSHA Guidelines
- Technical assistance provided for patient brochures and marketing efforts
- Continuous updates on latest imaging and software developments
- Assistance with organization of local physician educational seminars
- Off-site educational opportunities provided to medical and technical staff

Medical group provides:

Facility space

- Appropriate and adequate space for Nuclear Imaging Suite which is segregated, separate and apart from laboratories, including appropriate power supply, air conditioning, water and other utilities
- Appropriate and adequate space for the installation of the hot lab equipment
- Obtain any landlord consents required for the development of the Facility

Operating supplies

- Radio-Pharmaceuticals
- Crash Cart
- All other operating supplies

Licensing/radiation safety

- Medical Group shall provide a qualified and licensed physician to serve as the Medical Director for the Facility
- The Medical Director or another manager designated "Authorized User" shall serve as the Authorized User of the Facility and shall be designated as such on the Facility's Radioactive Materials License
- Medical Director shall serve as the Facility's Radiation Safety Officer

Administrative

- Medical Group shall be responsible for billing for all procedures performed at the Facility

Staffing

- Billing and Clerical personnel
- Stress Tech or Nurse

For additional information, please contact Cardinal Health, Radiation Management Services customer service at 440.248.9300, 800.850.4608, or fax: 440.349.2307; located at 6045 Cochran Road, Cleveland, Ohio 44139-3303, USA.
